## **DETAILED ACTION**

1. This action is in response to the amendment filed 10/19/04. claims 1-10 have been amended and are pending for examination. The rejection cited is as state below.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

- 3. Claims 1-8 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Lakritz (US. 6,623,529).
- 4. Regarding claims 1, 4, 7, 8 and 10, Lakritz discloses an inventive concept that is applicable for a storage device, comprising a processor;

Application/Control Number: 10/017,923

Art Unit: 2143

a computer interface connected to the process to enable the processor to communicate with a computer (browser couple with visitor module, fig. 2, interface processor are inherent in the visitor module; browser is a client interface that require a computer);

a network interface connected the processor to a file server (a visitor module, e.g., processor, communicated with a web server, e.g., file server, interface element is inherent, Fig. 2);

a storage means connected to the processor (visitor module communicated with database, cache 205-206);

the processor has read write access to the storage means (visitor module access storage 204-206);

Further, Lakritz discloses the processor of determining whether the requested file is in cache storage, if not request from file server, then caches it and send to client (Fig. 3). The process of notifying client if the requested file does not exist (Fig.10, Col. 36, lines. 57-60).

5. Claims, 2-3 and 5-6, required network interface and RAM, which both are inherent elements in any computer that are capable or functioning in notorious network, e.g., visitor module in figure 2. Specially, RAM has been utilized as cache in a conventional computer, long prior to the claims invention was made. Further Lakritz, discloses sending an object, i.e., HTML document, to clients. The HTML document in this instance is a read only file to the clients, since the clients have no permission right to alter and are incapable of modifying any part of the document.

Application/Control Number: 10/017,923 Page 4

Art Unit: 2143

## Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lakritz, as applied to claim 1 above in view of was what well known in the art.
- 8. Claim 9, required deleting cache content. Lakritz does not explicitly disclose the system required such feature. Official Notice is taken that detect cache content was well known in the art at the time of the applicant claims invention was made. Such well-known feature has been widely utilized for preserving cache space, by deleting outdated or least recent usage content from storage in order to make way for newly and higher demand content. Thus, including deleting cache content with Lakritz system would have been obvious to one of ordinary skill in the art at the time of the invention was made for a given reason.
- 9. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.
- 10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Application/Control Number: 10/017,923

Art Unit: 2143

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bunjob Jaroenchonwanit whose telephone number is (571) 272-3913.

The examiner can normally be reached on 8:00-17:00. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wiley can be reached on (571) 272-3923. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
